👛 PROFESSIONAL EXPERIENCE

Live Demo [🔗](#)

Front-End Developer

11/2023 – 12/2024

- Develop responsive websites using React and Tailwind CSS.
- Expertise in delivering professional, high-quality web solutions tailored to client needs, ensuring optimal performance and a seamless user experience across all devices.
- Consistently praised for achieving high levels of client satisfaction.

Front-End Developer using Next js

11/2024 – 12/2024

I am working on a freelance project to develop a hotel booking website using the Next.js framework. The platform includes a variety of advanced features aimed at providing a seamless and efficient user experience for managing hotel reservations and operations:

- **Authentication and Authorization:** A secure login system that ensures only authorized users can access certain features.
- **Reservation Management:** Logged-in users can create, update, and delete their reservations.
- **Profile Management:** Users can easily update and manage their personal profiles.
- **Cabin Filtering:** Users can filter cabins based on size and other preferences.
- **Comprehensive Hotel Booking Features:** The website includes all the standard features found in modern hotel booking platforms, such as room availability, pricing, and more.

This project leverages Next.js to ensure optimal performance, scalability, and a smooth user experience.

Live Demo [🔗](#)

Full stack web developer

- Built an eCommerce Web Application
- The website was based on a real business idea clothing brand called "Coder-Fit"
- The website is divided into two main parts:
 - Admin Dashboard
 - Main eCommerce Store
- Technologies used :
 - Front-end: HTML, CSS, React, Tailwind CSS
 - Back-end: Node.js, Express.js, MongoDB

PROJECTS

Live Demo [↗](#)

Fact-React-Pizza

07/2024 – 07/2024

- Developed “Fact-React-Pizza,” a responsive web application for a pizza restaurant using React and Tailwind CSS.
- The app features an intuitive interface for menu browsing, order customization, and seamless checkout, optimized for both mobile and desktop experiences.

Live Demo [↗](#)

Popcorn

06/2024 – 06/2024

- Developed "Popcorn," a web application for retrieving and displaying movie data and ratings using React and vanilla CSS.
- While the site is not responsive, it effectively provides users with detailed information about movies through dynamic data fetching.

Live Demo [↗](#)

WorldWise

05/2024 – 05/2024

- Developed websites using React and vanilla CSS.
- Expertise in delivering professional, high-quality web solutions tailored to client needs, with a focus on optimal performance and seamless user experience across devices.
- Note: The website is not currently responsive and work is performed locally.

Live Demo [↗](#)

Hotel Management System

- I'm developing a Hotel Management System website using React.js. This project integrates several modern web development tools to create a robust and user-friendly solution for managing hotel operations.
- Authentication System
- Booking Management
- Cabin Management
- Comprehensive Dashboard
- Configurable Settings
